

ALPHABEAM® LED Aviation Lights

APPROVED FOR HELICOPTERS

ALPHABEAM® LED Aviation Lights by Teledyne are FAA-PMA approved drop-in replacements to traditional incandescent and halogen bulbs used on most helicopters for exterior lighting applications.

ALPHABEAM® LED aircraft lighting uses patented non-imaging optics and robust materials for an extremely efficient, durable light that delivers excellent helicopter lighting performance without the maintenance of traditional light bulbs.

Benefits of LED Lighting Technology for Aviation

- FAA-PMA drop in replacement, no modification necessary for installation
- Significantly longer life for critical exterior lighting on aircraft
- Reduces maintenance time and cost, helps minimize aircraft downtime associated with light bulb outages
- Reduces power consumption on the aircraft
- Durable solid state LED lighting technology is ideal for harsh aviation environments
- See reverse side for helicopter model and part number applicability
